

[New: Startup Job Board](#)

You know what, the [previous posting](#) and [Robert's interview with edgeio](#) inspired me to create a quick and dirty [Swiss Startup Job Board](#).

There is a widget that you can integrate in your blog/website (see my sidebar). Or please at least put a link to the [job board](#).

I've already reserved some domains (startupjobs.ch/.de/.at/.eu) if the thing will take off :-). If that happens, all participating blogs/websites even could make some cash with the job board (we can charge for job offers and there's a revenue sharing program included).

What do you think? Is this just another stupid Saturday morning idea or can we make this happen?
